CCMS

Team Members & Roles

3rd & 4th Year – CSE A

The following team members are currently working on the CCMS project. The responsibilities are divided based on the development requirements of the project.

S.No	Team Member	Role / Responsibility
1	Hariprasath	Mobile Application – Frontend and Backend Development
2	Deepak S	Database Development
3	Akashprabu	Testing
4	Muthu ganesh	Integration

Project Responsibility Summary

Frontend and Backend Development – Mobile Application: Hariprasath is responsible for frontend and backend development, including designing and implementing the React Native screens, developing server-side API endpoints, implementing role-based authentication, and handling business logic for class coordinators.

Database Development: Deepak S is responsible for database architecture and design. This includes writing the Prisma schema for MongoDB, defining relationships, and implementing database access logic for handling weekly syllabus plans and progress logs.

Testing: Akashprabu is responsible for testing the application frontend and backend services, checking the workflow transitions, and ensuring correct data validation and offline SQLite storage behavior.

Integration: Muthu ganesh is responsible for the overall integration of the application, linking mobile client services with the backend REST endpoints, and configuring Word/PDF document generation engines.

Project: CCMS – Class Coordinator Management System (50% of Work Completed)
